

Brigitta Smith – AAAHT Appreciation Award Recipient

Presenter: Ms. Erin Livingstone

Nominated by: Ms. Kim Eremko

Brigitta Smith began volunteering for the AAAHT Continuing Education Committee in 2013. In 2016 a significant change occurred, she and her family moved out of province to the beautiful and vast territory of the Yukon. Amongst this incredible life change, she also took on the role of Committee Chair. Being remote as she is, she has contributed significantly to the Committee. She is ever present, organized and has demonstrated her leadership role by always keeping the committee focused while she chairs meetings...something we know is not always the easiest thing with leadership groups!

In her professional life, Brigitta is a technical product liaison for Bayer Animal Health. She always makes time for AHT students and has been instrumental in educating them about unique opportunities for RVTs in industry while upholding the image of the AAAHT and the value of volunteerism. She is a superb example of a successful RVT in a non-clinical role and ever deserving of this award.
