

Name of Program	Program Information	Program Website
AAEVT Equine Certificate Program	Current AVMA accredited programs tend to focus very little on the academics, skills, resources, and training required for proficiency as an equine veterinary assistant or technologist. Because these skills are needed by the equine practitioner and are essential for assistants, technologists and other staff to master, the AAEVT has designed this certification program for the equine veterinary community outside of the accredited AVMA programs.	www.aaevt.org
Animal Sports Therapy Rehabilitation (Equine)	Our flagship program, the Animal Sports Therapy and Rehabilitation (ASTR) certification, is a post-graduate, 302-hour course designed exclusively for licensed professionals	www.academyofanimalsportscience.com
CALAS/ACSAL Certification	CALAS is the foremost Canadian organization for providing certification of laboratory animal handling, husbandry, and research techniques, and is unique in the world for its qualifying examination, requiring a practical component and academic competency.	www.calas-acsal.org
CALAS/ACSAL Certification	CALAS is the foremost Canadian organization for providing certification of laboratory animal handling, husbandry, and research techniques, and is unique in the world for its qualifying examination, requiring a practical component and academic competency.	www.calas-acsal.org
Canine Osteoarthritis Case Manager Certificate Program	The course will help you improve the care and quality of life of dogs with osteoarthritis by having a designated case manager to help guide treatment and communicate with the owner	www.utvetrehab.com
Canine Rehabilitation Veterinary Nurse	The Canine Rehabilitation Veterinary Technician or Nurse (CCRVT and CCRVN) certifications, provide you with the foundational knowledge of anatomy, soft tissue therapy techniques, physical modalities, knowing when and how to progress exercises, and most importantly, when to alert your supervising CCRT of any issues. Finally, you finish up the certification with your 40-hour internship in an existing rehabilitation practice.	www.caninerehabinstitute.com
Certified Canine Fitness Trainer Program	This program will provide an overview of the regulatory issues involved in this field of practice, canine anatomy and physiology, behavior, nutrition, first aid and emergency procedures, and an overview of pharmacology and pharmacologic precautions. An emphasis is included on prevention and care of athletic injuries, canine strength and conditioning, therapeutic modalities, and assessment of fitness. Canine sports and working dogs and the requirements of their various sports and activities are also covered.	www.ncsuvetce.com
Certified Companion Animal Rehabilitation Therapist Program	The Certified Companion Animal Rehabilitation Therapist (CCAT) Program is a university-based, RACE approved credential program for canine rehabilitation education and training.	www.ncsuvetce.com

Certified Equine Rehabilitation Assistant for RVTs	Three parts - Introduction to Equine Rehabilitation, Equine Athletics and a Case Study Submission	www.animalrehabinstitute.com
Certified Veterinary Pain Practitioner	IVAPM's certification program was designed to be challenging and achievable. It is also a platform and incentive for continued learning about the many disciplines capable of enhancing comfort in animal patients.	www.ivapm.org
Companion Animal Euthanasia Training Academy	Dr. Kathleen Cooney, founder and director of education at the Companion Animal Euthanasia Training Academy (CAETA) guides learners in this course, which explores and hones the comprehensive skillset required in companion animal euthanasia. Within the ten-module course, participants explore topics including pre-euthanasia and anesthesia protocols, euthanasia techniques, pharmacology and physiology, caregiver considerations, challenging situations, team support, and more.	www.aaha.org
Equine Rehabilitation Certificate Program	In cooperation with the Colorado State University Orthopaedic Research Center, the University of Tennessee (in 2004) developed the only university-based, RACE approved credential program in equine rehabilitation. The Equine Rehabilitation Certificate Program (CERP) is a sequence of postgraduate courses for veterinarians, veterinary technologists, physical therapists or students of these professions, which include case studies and a cumulative examination. The CERP program is designed to guide the practitioner from the theoretical foundations to the clinical applications of equine rehabilitation.	www.ncsuvetce.com
Leadership in Healthcare Certification	A comprehensive and practical curriculum that explores a wide range of leadership competencies specifically tailored for healthcare settings.	www.nait.ca
Nutrition Case Management Online Certificate Program	This certificate program will provide veterinarians and veterinary technologists with an overall understanding of nutrition in veterinary medicine. A knowledgeable veterinary team can provide their patients with the safest and most effective treatment options in animal nutrition. not disaster medicine. It is not field (ditch) medicine.	www.utvetrehab.com
RECOVER Basic and Advanced Life Support Certification for Veterinary Professionals	RECOVER certification signifies one's knowledge and skills are up to date with current evidence-based guidelines. RECOVER offers certification for veterinary professionals in Basic Life Support (BLS) and Advanced Life Support (ALS) through a 2-step process involving online and in-person training. Certification is maintained by completing the online recertification course every 2 years. Veterinary professionals may also become certified RECOVER BLS and ALS instructors through an additional certification process.	www.recoverinitiative.org

<p>Technical Large Animal Emergency Rescue</p>	<p>Technical Large Animal Emergency Rescue (TLAER TM) is TLAER does NOT refer to “salvage / rescue” of neglected, starving or abused animals – although many of the techniques may be utilized on those types of scenes or in rehabilitation facilities. It is the practical Considerations, Behavioral Understanding, Specialty Equipment, Techniques, Methodologies and Tactics behind the safe extrication of a live large animal from entrapments (trailer wrecks, ditches, mud, barn fires) in local emergencies and disaster areas.</p>	<p>www.tlaer.org</p>
