

Name of Program	Program Information	Program Website
AAEVT Equine Certificate Program	Current AVMA-accredited programs offer limited focus on the specific skills, training, and resources required for proficiency as an equine veterinary assistant or technologist. Recognizing the need for these skills in the equine field, the AAEVT has developed a certification program tailored to the equine veterinary community, designed to complement existing AVMA programs.	www.aaevt.org
AAHA End of Life Care Certificate Program	This comprehensive course, led by Dr. Kathleen Cooney, is designed for veterinary professionals to enhance their skills in providing compassionate end-of-life care for companion animals. The program covers modern best practices, including euthanasia techniques, palliative care, and effective communication with pet owners.	www.aaha.org
Animal Sports Therapy Rehabilitation (Equine)	The Academy of Animal Sports Science (AASS) provides specialized education for licensed professionals in animal complementary health care, focusing on its flagship Animal Sports Therapy and Rehabilitation (ASTR) Program for equine and canine care. The program is taught by expert veterinarians and specialists worldwide, emphasizing evidence-based education and practical clinical experience.	www.academyofanimalsportscience.com
CALAS/ACSAL Certification	CALAS is Canada's leading organization for certifying laboratory animal handling, husbandry, and research techniques. It stands out globally for its unique certification process, which includes both a practical component and an academic competency examination.	www.calas-acsal.org
Canine Osteoarthritis Case Manager Certificate Program	This program improves the care and quality of life for dogs with osteoarthritis by providing a designated case manager. The case manager will guide the treatment plan and facilitate communication between the veterinary team and the pet owner, ensuring effective management of the condition.	www.utvetrehab.com

<p>Canine Rehabilitation Veterinary Nurse</p>	<p>The CCRVT and CCRVN certifications equip you with essential knowledge in anatomy, soft tissue therapy, physical modalities, and exercise progression for canine rehabilitation. The program emphasizes recognizing when to consult a supervising CCRT. The certification culminates with a 40-hour internship in a rehabilitation practice, providing hands-on experience in the field.</p>	<p>www.caninerehabinstitute.com</p>
<p>Certified Canine Fitness Trainer Program</p>	<p>This program covers regulatory issues, canine anatomy and physiology, behavior, nutrition, first aid, emergency procedures, and pharmacology. It emphasizes athletic injury prevention, strength and conditioning, therapeutic modalities, fitness assessment, and the needs of canine sports and working dogs in various activities.</p>	<p>www.ncsuvetce.com</p>
<p>Certified Companion Animal Rehabilitation Therapist Program</p>	<p>The Certified Companion Animal Rehabilitation Therapist (CCAT) Program is a university-based, RACE approved credential program for canine rehabilitation education and training.</p>	<p>www.ncsuvetce.com</p>
<p>Certified Equine Rehabilitation Assistant for RVTs</p>	<p>CERA focuses on building knowledge and skills in equine athletics, rehabilitation techniques, and the application of case study analysis. It aims to equip professionals with the expertise needed to enhance equine health and performance, ensuring they are well-prepared for real-world rehabilitation challenges.</p>	<p>www.animalrehabinstitute.com</p>
<p>Certified Veterinary Pain Practitioner</p>	<p>IVAPM's certification program is designed to enhance veterinary professionals' expertise in pain management. It includes coursework, workshops, and exams focused on pain assessment, pharmacologic and non-pharmacologic therapies, anesthesia, and chronic pain management.</p>	<p>https://www.ivapm.org</p>

<p>Equine Rehabilitation Certificate Program</p>	<p>The Equine Rehabilitation Certificate Program (CERP) is a series of postgraduate courses for veterinarians, veterinary technologists, physical therapists, or students in these fields. The program includes case studies and a final examination, designed to guide practitioners from theoretical foundations to the clinical application of equine rehabilitation.</p>	<p>www.ncsuvetce.com</p>
<p>Leadership in Healthcare Certification</p>	<p>A comprehensive and practical curriculum that explores a wide range of leadership competencies specifically tailored for healthcare settings.</p>	<p>www.nait.ca</p>
<p>Nutrition Case Management Online Certificate Program</p>	<p>This certificate program provides veterinarians and veterinary technologists with a comprehensive understanding of nutrition in veterinary medicine. A well-informed veterinary team can offer the safest and most effective treatment options for animal nutrition, focusing on preventive care rather than emergency or field medicine.</p>	<p>www.utvetrehab.com</p>
<p>RECOVER Basic and Advanced Life Support Certification for Veterinary Professionals</p>	<p>RECOVER certification demonstrates that a veterinary professional's knowledge and skills align with current evidence-based guidelines. The certification process for Basic Life Support (BLS) and Advanced Life Support (ALS) involves both online and in-person training.</p>	<p>www.recoverinitiative.org</p>
<p>Technical Large Animal Emergency Rescue</p>	<p>Technical Large Animal Emergency Rescue (TLAER) focuses on the safe extrication of live large animals from entrapments, such as trailer wrecks, ditches, mud, and barn fires, in emergency and disaster situations. TLAER emphasizes practical considerations, behavioral understanding, specialized equipment, and rescue methodologies for handling large animals in critical situations.</p>	<p>www.tlaer.org</p>

VCS Technician Membership	VCS membership offers veterinary professionals access to educational resources, networking opportunities, and the latest advancements in oncology. Members benefit from conference discounts, a learning platform, and collaboration with experts in veterinary cancer care.	https://vetcancersociety.org
Veterinary Human Support Certificate	The Veterinary Human Support Certificate provides education for animal related professionals on the four areas of Veterinary Social Work.	www.vetsocialwork.tennessee.edu
Veterinary Massage & Rehabilitation Therapy Program	This 142-hour Post-Graduate Education Certification Program is open to licensed veterinarians, certified or licensed veterinary technologists, licensed physical therapists, nurses, certified massage therapists, and other licensed healthcare professionals.	www.healingoasis.edu
